## **NEW TENTATIVE APPORTIONMENT PUBLIC HEARING**

Due to a defect with the newspaper notice for the June 28<sup>th</sup> meeting, the CEPD board will be unable to vote on an apportionment model at that time. The district will take this opportunity to present the apportionment methodology that is up for a vote at the next Regular Board Meeting on August 9<sup>th</sup> and will take questions from the public.

A new notice will be published and mailed to all property owners. The public is invited to be heard, but only objections raised in the August 9<sup>th</sup> Regular Board Meeting will have legal significance.

On August 9, 2021 at 1 p.m., the CEPD Board will hear comments from interested persons regarding the project plans and specifications, cost estimates and/or the tentative cost apportionment and assessment. CEPD will be sending out additional letters to the public at that time.

For all updates to our schedule, meeting agendas, and materials, please visit us at: <https://www.mycepd.com/board-meetings>

## **SEA TURTLE NEST RELOCATION ON CAPTIVA**

With the projects potential start in the next couple months, Sanibel Captiva Conservation Foundation has begun relocating nests that are laid in the project area. According to the SCCF June 16<sup>th</sup> newsletter update, 85 nests have been laid on Captiva and 14 have been moved out of the project areas.

SCCF has also begun a new research project to characterize the physical properties of sand along Sanibel and Captiva and evaluate how these variables affect the groundwater flow, moisture content, and temperature inside the nest cavity.

For more information on SCCF's work, sign up for their Wednesday Updates at this link: <http://www.sccf.org/our-work/wednesday-update>
